Requirements & tips

- Width of content is 900px with an equal amount of space either side (margin:auto will achieve this)
- The background blue gradient needs to be as wide as the width of the browser (title the background image using repeat-x) beyond the 900px
- The email needs to be a hyper link:
 - info@allRoundGardening.com.au
 You will need to add a class to the link so that the underline is removed and the font color is #003300
- The images are hyperlinks:
 -
 - A # means this document so the links do not actually go anywhere.
 - You will need to style each image so the border is removed and extra space is added between the images. NOTE: If a blue border is automatically added to an image if the image is surrounded by the <a> element.
- The footer image needs to be repeated to stretch across the whole width of the browser window beyond the 900px.
- The hyperlinks in the footer are not blue they are #003300
- Copyright symbol needs to be added (©)
- Footer text is aligned in the centre (text-align:center)

Process

Start by looking at the design and identifying the main blocks.

Start creating your design from the outside in and top down:

- 1. Create wrapper and background shading
- 2. Add logo to the header element

Should look like:

3. Add spring time text and contact details

The text for the contact details needs to be larger than the rest of the text and green. We need to locate the spring time text to the left of the contact details and place the contact details over on the right side. We need to remove the underline for the link and make it green.

Page should look like:

4. Add the image links and text

Quisque eros nulla, portitor ut fringilla in, cursus non ligula. Cras massa ligula, pharetra vulputate rhoncus ac, aliquam id urna.

5. Adding the footer

We need the footer outside of the wrapper as the background image will need to go all the way across to the edge of the browser.

That's it finished product!

Spring Time is Here!
